

*every valley*

*shall be exalted*

A smooth, continuous black line forming an S-shape. It starts at a low point on the left, curves upwards to a peak on the right, and then curves downwards to a low point on the far right. The curve is symmetrical and fluid.

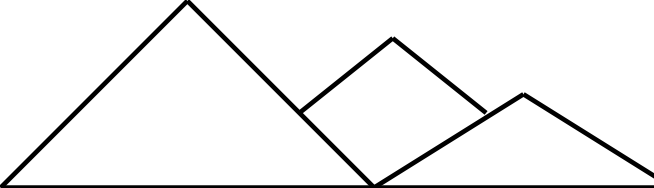

*the crooked*

A black line composed of several straight segments of varying lengths and angles, creating a jagged, zigzag pattern that rises and falls repeatedly across the frame.

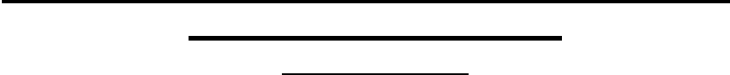

*straight*

A single, perfectly straight horizontal black line spanning the width of the diagram.

*rough places*

Three black-outlined triangles of different sizes and orientations. They are arranged in a row, with the second triangle overlapping the first and the third overlapping the second, creating a jagged, uneven profile.

*plain*

Three horizontal black lines of different lengths, stacked vertically and centered. The top line is the longest, the middle line is shorter, and the bottom line is the shortest, creating a stepped, flat appearance.
